Education

- | | |
|---|---------------------|
| • Reporting System And Database Development
Conestoga college, Kitchener, Canada. | Jan 2023 - Aug 2023 |
| • Mobile Applications Development
Georgian college, Barrie, Canada. | Jan 2022 - Aug 2022 |
| • Bachelor's in Information Technology
SVIT, Gujarat, India. | June 2017-June 2021 |

Professional Experience

Empowered Futures, ON

Back End Developer (Volunteer)

June 2024 – Present

- Developed scalable microservices using **Spring Boot** and **Hibernate(Spring JPA)**.
- Designed and integrated **GraphQL** and **RESTful APIs**, optimizing data flow and reducing latency.
- Maintained **SQL server** schema migrations and query optimization.
- Collaborated with frontend teams to ensure smooth data flow between backend APIs and user interfaces.
- Utilized **Docker** for containerization and contributed to **Agile/SCRUM** processes.

Projects

Cab Booking

- A simple project which implements communication between a producer & consumer using **Kafka**.
- **RestController**, **RequestMapping**, and **PutMapping** have been used to define Rest controller, Endpoints, and to make a PUT request.
- **Postman** utilized to make an API request.
- Used **Service** and **Autowired** annotations to mark a service bean and for dependency injection.

IRCTC Basic Ticket Booking

- Basic features like Login/SignUp, fetch booking, search for a train, seat booking, etc. are being implemented.
- Utilized concept of **Stream** interface to get the desired data.
- **ObjectMapper** is used for serialization & deserialization of the data.
- **JSON** is used as a local storage, **File** used to connect with the JSON files & **Hashed** password is implemented.

Quizapp

- Developed **RESTful APIs** using **Spring MVC** and **Spring Data JPA** for efficient database operations with **PostgreSQL (PgAdmin 4)**.
- Implemented **CRUD functionalities** using **@GetMapping**, **@PostMapping**, and **@DeleteMapping** annotations.
- Utilized **ResponseEntity** to manage and customize HTTP API responses.
- Executed **native SQL queries** for optimized data retrieval and reporting.
- Integrated **Lombok** to eliminate boilerplate code and improve code maintainability.

Technical Skills

Languages: Java(8, 11, 17), J2EE, SQL, Javascript, Typescript, C, C++.

Frameworks: Spring Boot, Spring MVC, React.js, Express.js, Angular 11+, Android studio.

Web: HTML, CSS, JSP, XML, JSON.

Databases: SQL server, MongoDB, Oracle, PostgreSQL, Prisma.

Tools: Sprint, JIRA, Kafka, Docker, Git.

Methodologies: Agile/Scrum, Waterfall, CI/CD pipeline.
